Dr Andrea Pavlickova, International Engagement Manager, Public Services Delivery Scotland, UK.

Dr Iris van der Heide, Senior Researcher, Netherlands Institute for Health Services Research - Nivel.

Co-funded by the
European Union

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

This session will take participants behind the scenes of the Knowledge Hub, exploring the co-design process that shaped its development, the principles guiding its evolution, and the functionalities that enable users to access resources, collaborate with peers and engage in learning activities.

What you will gain:

- Discover how the THCS Knowledge Hub was co-designed to meet the needs of the health and social care transformation community.
- Learn how to navigate the Hub and make the most of its key functionalities, resources and collaborative features.
- Explore practical tools available through the Hub, including the Transferability & Implementation Framework, to support the implementation and scaling of innovative practices.

of the journey!*

THCS Knowledge Hub: Key Designing Principles

- The key driving force for the development of the Hub is a **bottom-up approach** with the **users at the centre of co-design process**.
- The Knowledge Hub is **an online platform designed as a module-based platform**.
- **Several iterations of co-design are being undertaken** to enable continual improvement in the development of the Hub.
- **Mapping of existing Hubs and knowledge exchange platforms was conducted** to ensure we build on the existing resources and tools rather than duplicating the efforts and reinventing the wheel.

Experience

Evidence

Capacity building

Welcome to the THCS Knowledge Hub

The ambition of the THCS Knowledge Hub (KH) is to maximise the value of existing evidence and experience in transforming health and social care systems in order to improve the capacity of countries, regions and organisations to adopt and scale up the necessary changes.

<https://knowledgehub.thcspartnership.eu/>

Resources

Have you found resources that have been useful to you in your health and social care transformation journey? Please share them here so that others in the THCS Community can benefit too!

In this section you'll find a wide range of resources created by THCS partners and other stakeholders from across Europe and beyond. These include good practices, innovative ideas and approaches, policy tools, practical methods, blog posts, research articles, presentations, webinars and success stories.

You can search or filter by topic to quickly find the most relevant content to support your health and social care transformation journey.

Capacity Building

Capacity-building support is the foundation of the THCS Hub which allows interested stakeholders to share and learn about capacity-building and training opportunities offered by THCS community as well as other European and international communities. This can include dedicated knowledge transfer activities (study visits, webinars, podcasts, discussion groups, etc.) and training activities (masterclass sessions, DG Reform technical Assistance, etc.).

Synergies

The THCS hub actively searches and promotes relevant resources generated in other EU, national and regional initiatives, projects, portals and Hubs. This includes signposting and learning about these resources, mutual promotional and communication activities as well as connecting the owners/originators of these resources in order to foster collaboration and partnership-building activities.

Support for Transfer and Implementation

The THCS Transfer and Implementation Framework consists of three sections. The handbook provides guidance on how to transfer and implement a health and care solution developed elsewhere into a new environment. The solution description template enables the documentation and sharing of original solutions, as well as the reporting and sharing of results from adapting a solution developed elsewhere. The tools offer methods and tools to support the transfer and implementation process.

Handbook

Utilise the THCS handbook to support your transfer and implementation process.

[Review the handbook →](#)

Solutions

Browse health and care solutions, adopt a solution, or share your own solution.

[Browse or share solutions →](#)

Tools

Browse tools and use them to support your transfer and implementation process.

[Browse and use tools →](#)

**Inside the THCS
Knowledge Hub –
Use Practical Tools &
Frameworks**

Inside the THCS Knowledge Hub – Use Practical Tools & Frameworks

Browse and share health and care solutions

Clear descriptions of health and care solutions are essential for their transfer, adaptation, and implementation. A well-defined theory of change helps explain how a solution is expected to achieve its intended outcomes and under what conditions it works best.

In this section, you can explore a range of health and care solutions that have been developed or adapted by other Knowledge Hub users. Each solution description has undergone a review process focused on clarity and usability, ensuring that they are presented in a way that supports their adoption in different contexts and settings. The review process did not assess the evidence of effectiveness.

If you have developed or adapted a solution yourself, you are warmly encouraged to share it with the community by completing the online submission form.

[Before sharing your solution, please read these guidelines carefully.](#)

[Watch also the video that introduces how to describe health and care solutions in the THCS Knowledge Hub.](#)

CREATE SOLUTION

Transfer and Implementation Toolbox

This section offers a curated selection of tools and toolkits designed to support the transfer, adaptation, and implementation of health and care solutions across countries, systems, and organisations.

The toolbox provides practical resources to guide the transfer and implementation process.

Explore frameworks, methods, tools, and templates that help bring evidence-informed health and care solutions into everyday practice.

TOOL

PSAT — Program Sustainability Assessment Tool

The Program Sustainability Assessment Tool (PSAT) is a validated instrument for evaluating the sustainability capacity of health and care programmes. The tool consists of 40 items across eight sustainability domains. An online tool allows rating programmes across these sustainability domains.

[Read more](#)

Purposes: Scaling up, Implementing solutions

<https://sustaintool.org/psat/>

TOOL

ORCA — Organizational Readiness to Change Assessment

ORCA (Helfrich et al. 2009) is a validated 77-item instrument that measures an organisation's readiness to implement evidence-based practices in health and care settings. It is structured around the three core constructs of the PARIHS/i-PARIHS framework—evidence, context, and facilitation—and assesses their impact on implementation outcomes.

[Read more](#)

Purposes: Assessing feasibility, Implementing solutions

<https://doi.org/10.1186/1748-5908-4-38>

TOOL

i-PARIHS — integrated Promoting Action on Research Implementation in Health Services

i-PARIHS (Harvey & Kitson 2015) is an updated and integrated version of the original PARIHS framework. It proposes that successful implementation depends on the interaction between three core constructs: the innovation, the recipients, and the context. Facilitation

TOOL

FRAME — Framework for Reporting Adaptations and Modifications to Evidence-Based Interventions

FRAME (Stirman, Baumann & Miller 2019) is a structured framework and coding system for systematically documenting adaptations and modifications made to evidence based interventions during implementation and transfer. A freely available codebook and

Digital health and care

Digital health and care refers to the use of digital technologies, data, and information systems to support, deliver, and improve health and social care services, as well as to enhance people's health and well-being. It is not just about technology itself, but about how technology is used to improve access, quality, efficiency, and person-centred care.

Discover what's new on THCS Knowledge Hub - Upcoming events and engagement opportunities

Here's what's new since your last visit

Dear users of THCS Knowledge Hub,

Welcome to the latest edition of the THCS Knowledge Hub Newsletter! Stay up to date with the newest resources, tools, and opportunities designed to support the transformation of health and social care systems across Europe. In this edition, you'll discover the latest developments on the THCS Knowledge Hub, explore new features and resources, and find information on upcoming webinars, learning events, and opportunities to connect with the THCS community.

Europe's AI readiness in health: What digital health implementers need to know

Artificial intelligence (AI) is rapidly transforming healthcare. This EHTEL Implementers' Brief analyses the 2026 WHO Europe report on AI readiness in health, co-funded by the European Commission. It distils the findings into five key insights and explores their implications for health and care implementers. The brief also identifies three priority actions for digital health leaders and outlines the steps needed to support responsible and sustainable AI adoption.

THCS Learning Week - Spotlight Session: Real-world Transformation – Successes, Pitfalls and Lessons Learned from THCS funded projects

THCS-funded projects share experiences to inspire and inform future health and social care system transformation initiatives. Digital Cactus aims to generate evidence on how digital technologies can support the transformation of health and care services while maintaining a strong focus on person-centred care. ICAREWOUNDS aims to transform the management of chronic wounds by developing and validating an integrated care model supported artificial intelligence (AI).

[Browse and use tools →](#)

[Knowledge Hub THCS Partnership](#)

Co-funded by the
European Union

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

What could be improved from the user perspective?

1. Information on the quality of the information
2. Option to select information per phase of the R&I cycle
3. Dedicated section on THCS funded projects

Suggestion

Today: Resources -> Search -> Read

Potential future: Define problem -> Discover relevant knowledge -> Understand what is transferable -> Find people with experience -> Adapt the solution -> Implement -> Share learnings

What I learned from hosting a community

1. Easy to place new capacity building activities
2. Difficult to engage people and start discussions

[Knowledge Hub THCS Partnership](#)

Co-funded by the
European Union

Funded by the European Union under the Horizon Europe Framework Programme - Grant Agreement N°: 101095654. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them.

What could be improved from the community host perspective?

1. How do to reach the right audience?
2. How to turn visitors into participants?
3. What do users actually ask for?

Suggestions

- Communities including mirror group members and funded projects.
- Communities around problems rather than topics.

What could be learned from other EU knowledge platforms?

EU Health Policy Platform

- Give policymakers, researchers, healthcare providers, patients, practitioners and other stakeholders clearer opportunities to contribute content.
- Produce something concrete rather than simply exchange information.

EU Best Practice Portal

- The focus on transfer and implementation
- A clear quality and evidence framework for knowledge

What can we learn from other EU knowledge platforms?

- Translate complex evidence into decision-ready knowledge
- Measure whether knowledge is actually being used

Discussion

If we want the THCS Knowledge Hub to become a place that people actually use when they need to solve a health and care transformation problem, what does it need to do well?

Thank you for your attention!
